

**PROFESSIONAL  
LEAK  
INVESTIGATION**  
COMMERCIAL | RESIDENTIAL  
**\$299**

Infrared (IR) inspection with an infrared camera is a powerful and noninvasive means of monitoring and diagnosing the condition of buildings - residential or commercial. It quickly identifies problem areas that can't be seen by the naked eye and eliminates older, more costly inspection techniques that require lots of labor and destructive probing.

Our camera detects the following defects in all types of structures:

- ◆ Water Damage (Mold)
- ◆ Window/Door Leaks
- ◆ Plumbing problems
- ◆ Missing insulation
- ◆ Energy efficiency
